

## **Gurgl: DIAMOND BEATS followed by spring skiing with absolute snow guarantee**

**Last week, the winter festival "DIAMOND BEATS by Nassau Beach Club" transformed the entire Gurgl ski area into an exclusive clubbing location. Top-class DJ sounds, stylish lounge vibes and prime winter sports fun attracted countless guests to uppermost Ötztal. Now, Gurgl seamlessly continues with truly enjoyable skiing days – offering perfect conditions and snow guarantee until the end of April.**

For five days, the Nassau Beach Club crew swapped the sand of Ibiza for the snow of the Alps. At several locations throughout the ski area, winter guests enjoyed a unique blend of pulsating DJ beats and top quality skiing. The relaxed winter clubbing once again underscored the exclusivity of the unrivaled "Diamond of the Alps." Very special highlight: freshly fallen snow on the weekend ensured an impressive finale to the festival.

### **Sunshine skiing with perfect slope conditions**

Even after this event highlight, Gurgl's premium skiing experience remains at the highest level. Thanks to alpine altitudes between 1,800 and 3,030 meters above sea level, the slopes offer excellent conditions until late April. The recent snowfall has once again enveloped upper Ötztal valley in a winter-white dress, therefore skiers and snowboarders can enjoy memorable ski adventures on immaculate runs until 27 April.

### **Top quality skiing until Easter and even longer**

Thanks to 25 top modern mountain lifts and 112 kilometers of freshly groomed slopes every day, Gurgl offers skiing fun for all skill levels. Countless refreshment stops within the ski area attract guests to their sunny terraces where not only culinary treats are served but also an extra dose of vitamin D and awesome panoramic views of the Ötztal Alps.
