10 reasons for a winter holiday at the Skicircus

Beautiful mountains? You'll find them all over the Alps. Skiing? You can do that elsewhere, too. Great food and cosy mountain huts? Plenty of destinations have those. What truly sets the Skicircus Saalbach Hinterglemm Leogang Fieberbrunn apart is something that's difficult to put into words: its incredible variety. And the best way to discover it is for yourself. Experience that special way of life where freedom, sporting challenges and enjoyment come together. Here are ten reasons why the Skicircus Saalbach Hinterglemm Leogang Fieberbrunn is the Home of Lässig for us:

1. The long name

You might need to take a deep breath first. Because yes, the name Skicircus Saalbach Hinterglemm Leogang Fieberbrunn is long. But there's a good reason for that: the name is long because the variety behind it is just as extensive. Spanning two Austrian provinces, the region combines not only 270 kilometres of slopes and 70 modern lifts, but also three destinations that could hardly be more different.

2. 3 destinations – 2 provinces – 1 ski area

In Saalbach Hinterglemm, skiing is more vibrant than almost anywhere else. Two village centres with lively pedestrian zones invite you to stroll around, while almost every accommodation is located next to a lift or at the edge of a slope. Whether you're a racer, a leisurely skier or a beginner, there's something here for every winter sports enthusiast.

Saalfelden Leogang also impresses with its wide range of activities. If you're looking to enjoy Nordic winter sports or experience some culture during your winter holiday, this is the place to be.

On the Tyrolean side of the Skicircus lies Fieberbrunn in the Pillerseetal valley. The winter sports destination offers a diverse range of experiences, from skiing and cross-country skiing to freeriding. Families and leisure skiers will find excellent conditions on the slopes and cross-country trails, while the backcountry around Fieberbrunn offers challenging terrain for freeriders from all over the world.

3. Up to 408 kilometres of slopes and 121 lifts

With the Ski ALPIN CARD, which connects the Skicircus with Schmittenhöhe in Zell am See and Kitzsteinhorn in Kaprun, you can complement the extensive offering of the Skicircus Saalbach Hinterglemm Leogang Fieberbrunn with magnificent views of Lake Zell and high-alpine skiing on the glacier.

With just one ticket, you can explore up to 408 kilometres of slopes served by 121 lifts. And you don't even need a car: via the Viehhofen descent (168, Zone I), you can ski directly to the valley station of the zellamseeXpress and continue onto Schmittenhöhe – and back again. Free ski buses also connect all destinations within the ALPIN CARD network throughout the winter season, making it easy to get from A to B.

4. Cool can be quiet too – explore the backcountry

Away from the groomed slopes, the Skicircus also offers fantastic freeriding opportunities amid vast, natural and surprisingly peaceful surroundings. How you choose to explore is entirely up to you: many routes are located close to the lifts and require only a short hike – or you can head out on a ski tour and explore the backcountry under your own steam.

From enjoyable runs with wide turns through fresh powder and sunny spring-snow slopes to challenging, exposed faces, the mountains reveal their wilder side away from the pistes. It's a side appreciated by the world's best, too: every year, the FIS Freeride World Tour stops at the Wildseeloder in Fieberbrunn.

5. Creating unforgettable childhood memories together

Who doesn't look back fondly on family holidays in the mountains? Those first successful turns in the snow and the happy faces after skiing all the way from the summit down to the valley?

In the Skicircus Saalbach Hinterglemm Leogang Fieberbrunn, little skiers are introduced to winter sports in a fun and playful way by dedicated ski schools. Numerous Funslopes, Snow Trails, Speedchecks and family parks provide plenty of variety, where the sheer fun and excitement make everyone forget about the physical effort involved. Family-friendly hotels and restaurants, along with attractive discounts, help make for a relaxed holiday for the whole family.

6. Family-run businesses & outstanding cuisine

Stopping at a mountain hut is the perfect way to round off a day on the slopes – ideally with views of the surrounding mountains, friendly service, excellent food and the right people gathered around the table. The diversity of Saalbach Hinterglemm Leogang Fieberbrunn is reflected in its gastronomy, too. From rustic 300-year-old alpine huts and traditionally furnished mountain restaurants to exclusive venues serving outstanding international cuisine: with more than 60 places to stop for refreshments on the mountain, there's something for every taste. Relax in a deckchair in the sunshine after a hearty lunch, join a lively party when you feel like celebrating life, or simply refuel so you have enough energy to make the most of your day on the slopes. What makes the local accommodation scene particularly special – from guesthouses to five-star hotels – is that many establishments have been run by local families for decades. As a guest, you can feel their connection to and love for their home region.

7. State of the Art – infrastructure at the highest level

The Skicircus Saalbach Hinterglemm Leogang Fieberbrunn is continuously being modernised. In winter 2026/27, a new cable car at the Reiterkogel in Hinterglemm, a new reservoir at the Asitz in Leogang and numerous improvements throughout all three destinations will provide even greater comfort, efficiency and enjoyment – from modern lift systems to expanded facilities for families and winter sports enthusiasts of all skill levels.

A particular highlight is the region's night skiing: at the Unterschwarzachbahn in Hinterglemm and the Schanteilift in Leogang, night is turned into day several times a week. Thanks to modern floodlighting, you can keep carving turns even after dark.

8. Active holiday – nordic winter

The Skicircus offers much more than alpine skiing. Saalbach Hinterglemm Leogang Fieberbrunn is also an ideal destination for anyone interested in Nordic winter sports. One of the region's highlights is the Nordic Park at Ritzensee in Saalfelden Leogang. At the Fun & Snow Park, even the youngest visitors can playfully learn the basics of cross-country skiing, while experienced cross-country skiers will also find plenty to enjoy. When Ritzensee freezes over, it becomes a natural ice rink amid a winter-wonderland setting and a venue for exciting recreational ice hockey matches. Fieberbrunn in the Pillerseetal also offers ideal conditions for Nordic winter sports enthusiasts. The area surrounding the village, renowned as one of the snowiest spots in the Kitzbühel Alps, features a varied network of trails for both classic cross-country skiing and skating. This makes Fieberbrunn an excellent choice for an active winter holiday away from the alpine slopes as well.

9. The largest ski circuit in the Alps – The Challenge

"Ski your limit" is the motto of one of winter's most demanding ski circuits – and the figures speak for themselves: 65 kilometres of downhill runs, 32 lifts and 12,400 vertical metres. Sporty skiers can complete the Skicircus circuit through the "Home of Lässig" in around seven hours of skiing and lift time. With its impressive distance, "The Challenge" ranks among the most extensive renowned ski circuits in the Alps, surpassing even the „Sellaronda" , the „White Ring" and the „Königstour" in terms of length. The demanding circuit takes you all the way around the Skicircus, through all three destinations and across all five lift companies. Are you ready to take on the challenge?

10. Winter sun active – beside the slopes

Winter in Saalbach Hinterglemm Leogang Fieberbrunn can be enjoyed away from the ski slopes, too. 140 kilometres of perfectly prepared winter trails invite you to immerse yourself in the snowy landscape – with or without snowshoes. For some real tobogganing fun, choose from five different runs: take the traditional route with a walk up to the Spielberghaus in Saalbach, enjoy a fast-paced ride on rails with Timoks Alpine Coaster, or use the lifts to access Timoks natural toboggan run in Fieberbrunn, the run at Reiterkogel in Hinterglemm or the one at Asitz in Leogang. Tobogganing is available during the day and, on several evenings each week, after dark thanks to extended operating hours and floodlighting. During the day, slow things down with romantic walks through the forest, horse-drawn sleigh rides through the valley or scenic excursions to places such as the winter hiking trail to the Asitz summit, Ritzensee in Saalfelden or the Treetop Trail with the Golden Gate Bridge at the end of the valley in Hinterglemm. This makes winter an unforgettable experience for young and old alike – even without skis.

New in Winter 2026/27

UP TO THE PEAK: D1 REITERKOGEL IN HINTERGLEMM

The new D1 REITERKOGEL cable car in Hinterglemm will bring a significant upgrade in comfort and quality for winter 2026/27. The existing lift, dating back to 1997, will be replaced by a modern 10-seater monocable gondola, identical in design to the 12er KOGEL cable car.

A particular highlight is the new second section, which will provide a direct connection all the way to the summit. With a transport capacity of up to 2,500 passengers per hour, the new lift will ensure fast and comfortable access to the mountain.

In both summer and winter, the Reiterkogel is a true family mountain: easy to navigate, varied and offering a wide range of activities for visitors of all ages.

Facts:

- Lift type: 10-seater monocable gondola – Doppelmayr
- Construction start: April 2026
- Completion: November 2026
- Transport capacity: 2,500 passengers per hour
- Inclined length: 2,111 m
- Speed: 6 m/sec
- Vertical rise: 669 m
- Journey time: 8.61 min
- Number of cabins: 71

NEW RESERVOIR ASITZ III

Greater snow reliability and comfort on Leogang's valley runs

Leogang is also continuing to invest in the quality of the winter experience. The new Asitz III reservoir, with a capacity of 60,000 m³, will enable even more efficient and faster snowmaking on the slopes close to the valley, further improving snow reliability and slope quality. At the same time, the blue piste 203 (Forsthof descent) has been upgraded and equipped with a new snowmaking system. A new blue piste, 204, including snowmaking facilities, has also been constructed between the Almbahn and Riederfeldlift. Together with the Kühbühel descent (201), which was upgraded last year, three valley runs at the Asitzbahn have now been significantly improved, making them even more comfortable and attractive – particularly for less experienced skiers.

EXPANSION RESERVOIR SCHATTBERG

The expansion of the Schattberg snowmaking reservoir to a capacity of 145,000 m³ will create ideal conditions for perfectly groomed slopes and a reliable winter sports experience on the Schattberg in Saalbach Hinterglemm.

MUST Rides: Most Unique Skicircus Tracks

From winter 2026/27, the four **M**ost **U**nique **S**kicircus **T**racks invite you to discover the most legendary runs in the Skicircus Saalbach Hinterglemm Leogang Fieberbrunn:

BLACK BEARD – THE LEGEND OF THE BLACK RUN

Where the black beard appears, things get steep. Seriously steep. Legend has it that the feared pirate captain Black Beard hid his greatest treasure not on the high seas, but high up on the Schattberg. Yet he only revealed the way to those who proved they had courage, skill and nerves of steel. Today, his trail leads down pistes 1b and 1a – and along the steepest descent in the Skicircus. This is no place for leisurely turns, but a real challenge that demands your full concentration. Follow in Black Beard's tracks and you'll encounter steep sections, plenty of vertical metres and a true adventure beneath your skis. A run for everyone who wants to find out if they have what it takes to join Black Beard's crew.

SNOW CRYSTAL – THE SLOPE OF THE WORLD CHAMPIONS

Where the snow crystal leads the way, every turn becomes part of skiing history. In February 2025, the world's best skiers battled for hundredths of a second, medals and the coveted world championship title here during the FIS Alpine World Ski Championships. Today, the course on the Zwölferkogel is open to everyone – offering the chance to experience the feeling of skiing a genuine World Championship course for yourself. Steep sections, rapid changes of direction and distinctive key passages show why piste 36 became one of the main stages of the World Championships. From start to finish, memories of unforgettable races accompany you down the mountain. A run steeped in history that has lost none of its fascination since the World Championships. Not everyone can become a world champion – but anyone ready to take on the challenge can ski the course.

PANORAMA SLOPE – CARVING WITH VIEWS OF THE LEOGANGER STEINBERGE

Where the Leoganger Steinberge seem close enough to touch, spectacular scenery meets pure skiing pleasure. The Steinberg piste (211 and 212) impresses with wide slopes, enjoyable carving turns and one of the most breathtaking views in the Home of Lässig. As you make your way down, spectacular views of the distinctive peaks of the Leoganger Steinberge open up again and again – a backdrop that gives this run its unmistakable character. Two designated viewing platforms along the Panorama Piste invite you to stop for a moment, take in the impressive mountain scenery and capture some memorable photos. This isn't about finding the steepest line or setting the fastest time. It's about wide turns and pure skiing enjoyment. Ski the Panorama Piste and experience Leogang from one of its most beautiful sides.

RECKMOOS NORD – A HELL OF A RUN.

Where the red horns lead the way, a run begins that truly lives up to its name! Other pistes boast about sunshine. Reckmoos Nord has something better: shade. On the side of the mountain facing away from the sun – also known as the Black Side of the Sun – the snow stays just the way skiers love it for longer: grippy and compact. In other words, in top condition – or simply devilishly good! The terrain is varied and wide without being extreme, and somehow feels a little different with every run. Reckmoos has been one of Fieberbrunn's defining ski areas since 1982. Piste 121 is a run with history – and one that rarely reveals all its strengths in just a single descent.

Celebrating 50 years of Skicircus

Ski tourism has deep roots throughout the region. Saalbach's first ski lift opened back in 1945, with Hinterglemm following in 1950. Bergbahnen Fieberbrunn began operating in 1958, and Leogang's first ski lift opened in 1971. Initially, each destination developed independently, before Saalbach and Hinterglemm were first linked in 1968.

1975/76: Expanding beyond the valley

Seven years later, the next major milestone followed. The new ski connection from Saalbach to Leogang extended the ski area beyond its local boundaries, linking the two valleys via Schönleiten and Großer Asitz for the first time in the winterseason of 1975/76. A shared ski pass turned this physical connection into a unified offering, giving guests even more freedom to explore. In 2015, the TirolS cable car established the connection to Fieberbrunn. Since then, the Skicircus has spanned the Austrian states of Salzburg and Tyrol, offering 270 km of slopes and 70 lifts.

Each new connection brought the destinations closer together, and new routes continue to emerge where boundaries once stood. Under the 'Home of Lässig' banner, the cable car companies in Saalbach Hinterglemm Leogang Fieberbrunn and the three tourism boards work closely together, both in winter and increasingly in summer as Austria's largest bike region.

ANNIVERSARY CELEBRATION ON 19.12.2026

In 2026, we are coming together to celebrate 50 years of the Skicircus. A joint press ski day is planned during the anniversary week. On 19.12.2026, the cable car companies will host a gala evening to celebrate the journey so far and look ahead to the future.

Skiers can also look forward to a special anniversary offer: on 19.12.2026, an adult day ski pass for the Skicircus Saalbach Hinterglemm Leogang Fieberbrunn will cost just 50.00 Euros. As on every Saturday, children and young people up to the age of 19 can ski for 15.00 Euros with the 'Junior X-plore Card'. All skiers will receive a complimentary anniversary pin, and several mountain huts will host anniversary celebrations featuring live music and other entertainment.

Magic March

Ski Spring Skiing at its Finest: Magic March in the Skicircus Saalbach Hinterglemm Leogang Fieberbrunn promises spring skiing at its best, with fantastic family deals, exciting mountain events and relaxed spring vibes on the slopes.

Early start in the morning sunshine

Early birds get to experience skiing at its very best. From March onwards, selected lifts open as early as 7:30 am, allowing skiers to enjoy beautiful runs in the morning sunshine. Thanks to the freezing temperatures overnight, even the spring snow can be groomed to perfection, while the wide-open slopes offer experienced skiers plenty of space for smooth, sweeping carving turns. The modern lift infrastructure also ensures that no valuable skiing time is wasted queuing for lifts.

Tip for beginners

March is also a hidden gem for anyone just starting their skiing journey. With quieter slopes, there is plenty of room for everyone. Spend a few hours skiing in the morning before relaxing in the sunshine at a mountain hut. And for a safe and comfortable return to the valley, all cable cars can be used for the journey down.

Easter bonus for families

With the easter bonus, children born in 2011 or later receive a free ski pass from 20 March to 4 April 2027 when a parent purchases a ski pass for at least four days (excluding season passes). The free children's ski pass is available directly at the lift ticket offices. Families can also benefit from attractive Easter discounts on accommodation and ski rental.

Celebrating spring together

Magic March wouldn't be complete without a well-deserved stop at a mountain hut. In the afternoon, soak up the sunshine, breathtaking mountain views and delicious regional cuisine on the terraces of more than 60 mountain huts. From 19 to 28 March 2027, the White Pearl Mountain Days transform the Skicircus Saalbach Hinterglemm Leogang Fieberbrunn into an extraordinary festival destination. For ten days, around 20 locations host 80 international DJs and live acts, celebrating the arrival of spring in style. A Balance & Recovery programme and culinary highlights from Austria and around the world complete the experience.

Special Offers for Children and Teenagers

"Kids on Ski" –Saalfelden Leogang gets kids on skis for free

The "Kids on Ski" initiative aims to inspire absolute beginners aged between 3 and 5 to discover the joy of skiing. During selected weeks outside the main school holiday periods, children can take part in a ski course free of charge. Accommodation in their parents' room at participating Leogang accommodation providers (Hotel Krallerhof, Good Life Resort Riederalm, Biohotel Rupertus, Hotel Der Löwe, Naturresort Puradies, Hotel Bacher, Pension Tannenhof, Appartement Grundner and Der Millinghof), ski passes and even rental equipment are provided free of charge.

The initiative aims to encourage the next generation of skiers in the long term and introduce young children to the joy of skiing from an early age.

Learn to Ski: Free instructors for school groups in Saalbach Hinterglemm

During selected promotional periods, the Saalbach Hinterglemm Tourist Board, in cooperation with Ski Austria, provides free ski instructors for beginners taking part in school ski trips.

The required number of ski instructors can be requested through the youth accommodation providers up to one month before arrival, meaning teachers do not have to organise anything further. The initiative aims to ensure that pupils associate skiing with a positive experience and to inspire the skiers of tomorrow.
